PERSONAL STATEMENT

I am a self-taught web developer with a passion for building exceptional digital experiences. Having worked in hospitality I am now pivoting to work in, and fully commit to, a field I consider my true calling.

My interest in web development began in 2005 when I was creating custom myspace themes (with HTML & CSS) for myself and friends. I have continued this love of web development ever since, working on projects in my spare time.

I focus primarily on front end technologies and am very passionate about creating elegant and simple products that conform to a user's expectations. I have also created full-featured and robust backends with APIs and databases in order to gain a complete understanding of modern development stacks and techniques.

WORK HISTORY

Lunan House Hotel   **Current**

Part time chef. 2 weeks notice required.

Abbreviated Work History   2000-2023

I have worked in hospitality for two decades as both back of house (chef) and front of house (at univesity). Starting as a barman and working my way up to kitchen manager/head chef. I have created and designed menus, set up supply chains, hired and trained staff and although I pitch myself as a jr. developer I consider my self a senior with respect to teamwork, communication and time management. I am happy to provide an expanded work history if requested.

ACADEMIC RECORD

University of Aberdeen   2000-2004

BSc (Hons) Biomedical Sciences, 2:1

KEY COMPETENCIES
